RENEWABLE ENERGY

Brihaspathi Technologies is a trusted provider of renewable energy solutions, dedicated to building a greener future. As a system integrators for solar rooftop solutions, we deliver high-quality, efficient, and affordable energy systems tailored to residential and commercial needs. Combining innovative technology with expert execution, we ensure seamless installation and reliable performance. Our mission is to make clean energy accessible, reduce carbon footprints, and provide sustainable energy solutions at the best price.

SOLAR SMART POLE

Our Solar Smart Poles, an innovative product by Brihaspathi Technologies Ltd., offer a complete standalone surveillance solution powered by solar energy. Equipped with CCTV, Wi-Fi, Ad Display, LED Lighting, PA System and Intercom and Charging points, these poles provide all-in-one security without the need for traditional infrastructure.

SMS MARKETING

SMS, WhatsApp, RCS, IVR, Toll Free, AI Chat Bot and many more marketing services offer direct, personalized communication with your audience, delivering promotions, updates, and alerts instantly to their mobile devices. These services provide high engagement rates, allowing businesses to reach customers efficiently and build lasting relationships.

IT & TELECOMMUNICATION

IT and Telecom Infrastructure form the backbone of modern communication and digital services across industries. **We deliver End to End IT and Telecom solutions that drive business operations, promote innovation, and ensure seamless global connectivity throughout India.** From high-speed internet and cloud computing to mobile networks and data centers, our infrastructure supports efficient workflows by integrating advanced technologies like 5G, virtualization, and automation. Transform your business with our comprehensive solutions, tailored to enhance connectivity and operational efficiency, driving success in the fast-evolving Indian market.

IT & TELECOM PRODUCTS

Fiber Optic Cables

Servers & Switches

Routers

IT and Telecom Infrastructure products encompass a wide range of technologies essential for modern connectivity and data management. These include Servers, Routers, Switches and more that ensure seamless communication and secure data flow across organizations. Combined with Telecom products like Mobile Networks, Fiber Optic Cables, and more. they enable efficient operations, high-speed internet, and cloud services.

SECTOR WISE EXCELLENCE IN CCTV SURVEILLANCE

Government

With a commitment to innovation and reliability, we empower government agencies like ECI, DRDO, IOCL, and more with the tools they need to maintain order, prevent incidents, and respond swiftly to any situation. Our proven expertise in implementing comprehensive surveillance solutions makes us the trusted partner for government entities.

Banks

We specialize in providing CCTV surveillance solutions designed to meet the stringent security requirements of the banking sector, including institutions like Union Bank, Karur Vysya Bank, Canara Bank, South Indian Bank, and more. By integrating our CCTV systems and burglar alarms into banking environments, we help financial institutions enhance their security measures, deter criminal activities, and maintain a secure atmosphere.

Defence

Surveillance plays a critical role in defence, allowing for real-time monitoring and analysis of activities, which enhances situational awareness and enables faster response times to potential threats. We have provided various surveillance solutions to defense entities, increasing their operational efficiency with top-notch features and advanced technologies.

Commercial

Surveillance in commercial buildings has become essential for ensuring the safety and security of the public. We provide cutting-edge solutions to all commercial establishments, including malls, retail outlets, supermarkets, and more, helping them elevate their surveillance capabilities with the latest technology.

Industrial / Warehouse

Industries and warehouses require tailored surveillance solutions, and we ensure that the solutions we offer are of the highest quality. Whether it's rugged systems like blast-proof cameras, sophisticated solutions like thermal imaging cameras, or standard project-designed cameras, we provide the right tools to meet the specific needs of industrial and warehouse environments.

Residential

Surveillance in and around gated communities and residential homes is an effective way to deter and prevent break-ins and burglaries. It also provides homeowners with peace of mind, allowing them to monitor their property and loved ones, even when they are away. With over 18 years of experience in this field, homeowners can trust Brihaspathi to deliver the best service and solutions for their security needs.

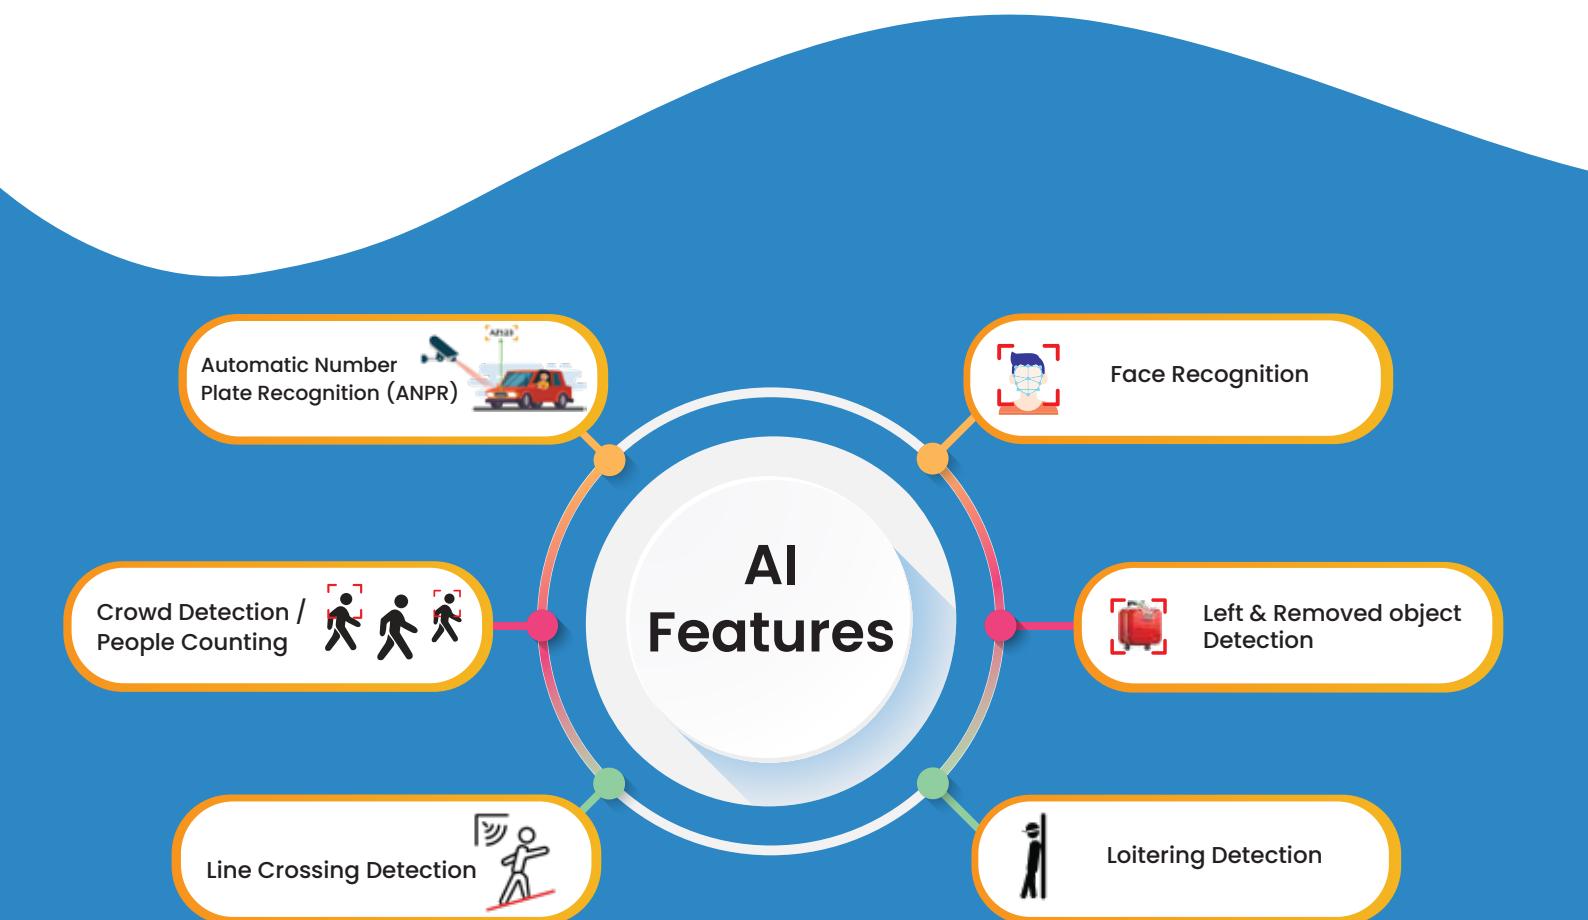

COMMAND CONTROL CENTRE WITH AI FEATURES

An Integrated Command Control Centre is essential for Surveillance as it serves as the Central Hub for Monitoring and Managing all Surveillance Systems. It allows for Real-Time coordination and communication between different security personnel, enabling a faster and more effective response to potential threats. Additionally, it Provides a Centralized Location for data Collection and Analysis, Improving Situational awareness and Decision-Making Capabilities.

With Video Analytics features developed using AI, there will be a huge Improvement in the efficiency of the operations and can transform the Surveillance System into a preventive one rather than a reactive one.

MANUFACTURING PRODUCTS

ANWI - ZENO SERIES LAPTOPS & ALL IN ONES

Trinai is a renowned CCTV Camera Manufacturing Unit known for its Cutting-Edge Surveillance Solutions. Established to address the growing demand for Security Systems. Trinai Specializes in producing High-Resolution Cameras with advanced features such as AI, Night Vision, Motion Detection and Remote Access. Our Manufacturing process is Highly Automated, Ensuring Precision and Efficiency.

Our R&D Team continuously Innovates to Integrate the Latest Technology, Enhancing the Reliability and Performance of the products.

We are a leading manufacturer specialized in high-performance All-in-One systems and laptops, designed to meet the demands of modern professionals. Our products combine cutting-edge technology with sleek, functional designs to deliver exceptional reliability and efficiency. With a focus on innovation and quality, we provide solutions that enhance productivity and elevate your work experience.

Technorack is a Prominent Manufacturer Specialized in High-Quality Networking Racks and Enclosures. Catering to the Needs of Data Centers, Telecommunications and IT Infrastructure . Technorack produces a wide range of racks that offer Robust and Flexible Solutions for equipment Housing.

The Manufacturing Unit is equipped with State-Of-The-Art Machinery and follows Stringent Quality Control Processes to ensure durability and precision in every product.

SMART GPU WITH TRINAI CAMERA:

Brihaspathi is revolutionizing surveillance technology by integrating advanced AI-driven features into its Smart GPU with the TRINAI Camera. This innovative system leverages cutting-edge software R&D to provide unparalleled monitoring capabilities, making it an indispensable tool for modern security needs.

Benefits for Home Use

Enhanced Security: Acts as a deterrent for intruders and helps monitor entry points, interiors, or outdoor spaces.

Post-Incident Analysis: Provides recorded evidence of events, making it useful for investigating theft, vandalism, or other incidents.

Remote Access: Many DVR systems now offer apps for live streaming or reviewing footage remotely via smartphones or tablets.

Safety Monitoring: Ideal for keeping an eye on children, elderly family members, or pets when you're away.

Cons for NVR

Scalability Limitations: Fixed number of camera connections; requires hardware upgrades for expansion.

Centralized Failure Risk: Single point of failure can disrupt the entire surveillance system.

Lack of Real-Time Analytics: Limited or no support for AI-driven real-time insights.

Limited Remote Access: Often lacks robust cloud integration for flexible monitoring.

ACHIEVEMENTS

We successfully installed over **1,00,000 cameras** across India during the **General Elections of 2024**. Remote, critical, and isolated polling stations were monitored at both the district level and CEO offices by setting up advanced Command Control Centres.

To ensure secure and accurate vehicle routes, we installed **40,000 GPS tracking devices** across India for **live tracking of election vehicles**, preventing any deviations in their paths.

We deployed **400 PTZ cameras** for the **Flying Squad Teams** to address and monitor complaints of Model Code Violations (MCV) during the elections.

In the **General Elections of 2019 in Andhra Pradesh and Assam**, we installed **70,000 cameras**. Remote, critical, and isolated polling stations were again monitored effectively through district-level and CEO office Command Control Centres.

Installed **110 PTZ and IP Dome Cameras**, along with an **Under Vehicle Scanning System** to detect potential hidden threats.

Installed **105 PTZ and IP Dome Cameras** with a video management system, combining video conferencing and live streaming on a single platform.

ACHIEVEMENTS

We Installed **200+ PTZ & Bullet Cameras** server with Video Analytics for **Tata Power Project**. This Installation will provide Security and Monitoring at the entire Tata Power Plant.

We installed **674 PTZ and bullet cameras** along the International Borders of Rajasthan (Pakistan) and Bangladesh for the **Border Security Force**.

Installed **60 IP cameras with PA systems** at Hyderabad AMD and **55 IP Cameras** at Bengaluru AMD, enhancing security at these critical research facilities.

We are set to install over **300 PTZ, bullet and flame-proof cameras** at **IOCL plants**, significantly enhancing their security and surveillance capabilities.

We developed an **Android-based vehicle tracking software** for real-time monitoring of vehicles, improving logistics and **fleet management efficiency**.

ACHIEVEMENTS

Installed **1,500 cameras** at **Aarogyasri** across **Andhra Pradesh**, including remote and isolated locations, within a week, ensuring comprehensive coverage.

Commissioned **225 cameras**, including **18 ANPR cameras**, to monitor the entry and exit movements of vehicles at **Banjara Hills MP and MLA Colony**.

Installed and commissioned **3,000 cameras** across **AP Market Yards**, ensuring secure and efficient operations.

ACHIEVEMENTS

120 CCTV Cameras Installed at **Kondagattu Anjaneya Swamy Devasthanam** in a record time Integrated with Command Control Centre.

Installed and commissioned **120 cameras**, enhancing the security and monitoring capabilities at **NTTPS**.

Srisaila Devasthanam: Successfully installed and commissioned **200 cameras**.

Sri Kalahasti Temple: Successfully installed **150 cameras** to enhance security at this sacred site.

Installed **600 CCTV cameras**, providing comprehensive surveillance for **IVY Comptech's operations**.

Installed **64 IP-based** high-definition dome cameras for precise identification and monitoring at **Dazn Software Pvt. Ltd.**

Installed **60 CCTV cameras**, improving the monitoring and security of factory and plant premises at **India Cements**.

► Rajeshwar P, Managing Director

Brihaspathi Technologies: Embedding Quality Standard Technologies in Security Systems

of services includes web and mobile apps development, fire safety & security systems, surveillance systems and GPS systems.

Quality Performance CCTV

Brihaspathi Technologies brings the latest CCTV Surveillance Systems for small, medium and large business establishments. "Our CCTV Surveillance Systems include internationally accredited, technologically advanced Cameras, Digital Video Recorders and Monitors", claims Rajeshwar P, Managing Director, Brihaspathi. The company delivers a variety of CCTV Surveillance Systems that offer complete security to premises with quality performance, robust back up facilities and prompt servicing support. Brihaspathi Technologies' CCTV systems support team goes a step further to advise on strategic placement of cameras, and observation of the camera's input on monitors.

T & A Systems

The company's Biometric T&A systems help in reducing human resources costs, easy wage calculation and

The company's Biometric T&A systems help in reducing human resources costs, easy wage calculation and human resources management

management. Each Biometric T&A system offers business management solutions suitable for all types and sizes of business. The T&A systems offer biometric recognitions at three levels - fingerprint, iris and face. Brihaspathi offers two types of biometric systems. "Software used in our Cloud based Biometric devices are indigenous, developed by our software team keeping in view of problems faced by companies in maintaining their employee record, in general all the biometric devices have prescribed features designed by the manufacturer but our cloud based T&A system features are unlimited and can be customized to any extent depending upon customer's requirement and can offers accurate development possibilities", adds Rajeshwar. The biometric access control system based on professional fingerprint access and time attendance control system. The proximity access control system deployed in offices and factories allow for time zone settings, and ensure an absolute safety environment. Biometric Attendance Management System (BAMS) comes with simple and hassle free GPRS/ Wi-Fi interface which is easy to integrate into any kind of existing applications including static applications and cloud applications.

With 6500+ clients spreading across various industries & vertical markets, Brihaspathi Technologies will continue to provide the technical guidance and right business development combined with excellent domain expertise and skills to make a mark in the emerging and next generation CCTV and Biometric T & A technologies. ■
